Detailed description of project						Type of services provided			
<p>Madrid City Council is developing a strategy of mobility management that will solve mobility problems in a big city in an integrated manner that allows for better and more efficient traffic management and the promotion of sustainable modes of transport (walking, cycling and public transport).</p> <p>At the core of this strategy for mobility the newest initiative is the Mobility Centre, created in September 2005. Transport systems are wide and complex in cities like Madrid and there is also a need to provide information to its citizens and cater for the special situations that can be produced on a daily basis in the streets of Madrid. This is a project in which Consultrans provides the Council of Madrid with permanent technical assistance of transport experts in real time.</p> <p>The Mobility Centre is integrated by a team of experts in Transport Planning, Transport Macro and micro modellers, Transport Engineers and GIS experts that work on a permanent basis hand in hand with the Client.</p>						<p>Development and maintenance of the Transport Macro Model for the city of Madrid</p> <p>Definition and testing of future year scenarios. Including the new M-30</p> <p>Microsimulation of Public Transport and private traffic proposals. Intermodal Areas</p> <p>Development and maintenance of a GIS database with the status of roadworks on the network.</p> <p>Technical support for the Motorcycles web page</p>
